

SINTEL

installatori di energia

about us

During this years of activity, a carefully planned growth, along with our constant commitment, allowed us to build a comprehensive and complete company, well versed in the field of electro-mechanics, industrial automation technology, plants for industrial and residential buildings, new and renewable energy, home and building automation.

Our dedication and attention to details, the efficiency of our services and after-sales support led Sintel to grow into a flexible and reliable company provided with an extensive operativeness that offers added values to our clients in order to gain full customer satisfaction.

The extended range of our expertise allows us to offer a

complete service, starting from early planning all the way to feasibility studies, carrying out, testing, monitoring, after-sales support and planned upkeep interventions, along with customized services for our clients.

Our primary goal has always been the offer of a high-quality service, which we can guarantee through our investments in technology, resources and research.

We can provide skilled labour and an always up-to-date know-how in order to make the best use for technology and materials. Sintel can manage and oversee even highly complex projects, as it operates in the filed as a general contractor

electrical plants • renewable energy

We design, carry out and manage electrical plants for residential and industrial buildings, fully customized to the clients' needs.

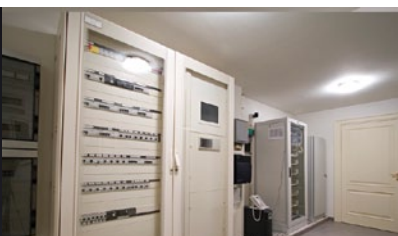

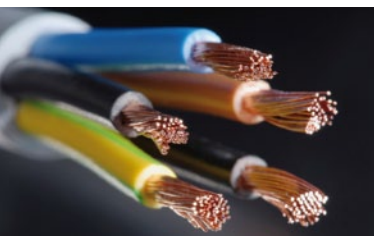

We offer supply contract and complete installation of:

- Transformer rooms
- Switchboards and electrical panels
- Anti-explosion plants
- Data-link and copper/optical fibre wiring
- Anti-intrusion devices, fire prevention systems, security and surveillance systems, CCTV

In order to meet environmental standards, increase performance performances in your energy saving activities, we plan:

- Solar photovoltaic system
- Cogeneration plants

We offer feasibility studies, cost-benefit analysis, efficiency analysis, planning, sizing, bureaucracy procedures, installation, connection to power distribution network, testing monitoring and assistance to ensure a correct use of your plants.

automation technology • mechanical plants

We design and carry out hardware and software projects for numerical control machineries, automation processes, installation, customer support and service contract c/o clients' premises.

We offer supply contract and complete installation of:

- Electrical control panels
- Software PLC and supervision
- Power boards and wiring harness on the edge of the machine
- Electrical and mechanical maintenance, customer assistance in Italy and abroad

We plan and install:

- Air conditioning systems and heating plants
- Thermal station
- Water supply and sanitary works
- Air treatment
- Fire safety systems

To meet our clients' needs we study customized solutions, fit on clients' buildings, within the law.

building construction • home and building automation

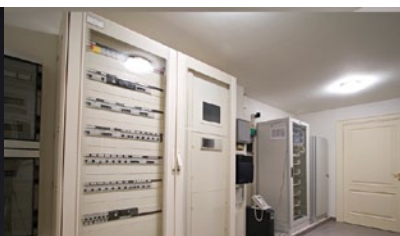

We offer different levels of intervention on industrial buildings:

- Building structures
- Plasterboard jobs
- Renovations

Our coordinated intervention on industrial buildings allows us to guarantee synergic and effective solutions.

We plan, design, install house and workplace automation devices (such as light and climate control, doors and window shutters control, security and surveillance systems, multi-media home entertainment systems, automatic plant watering and pet feeding etc.) for the comfort and security of its residents.

maintenance

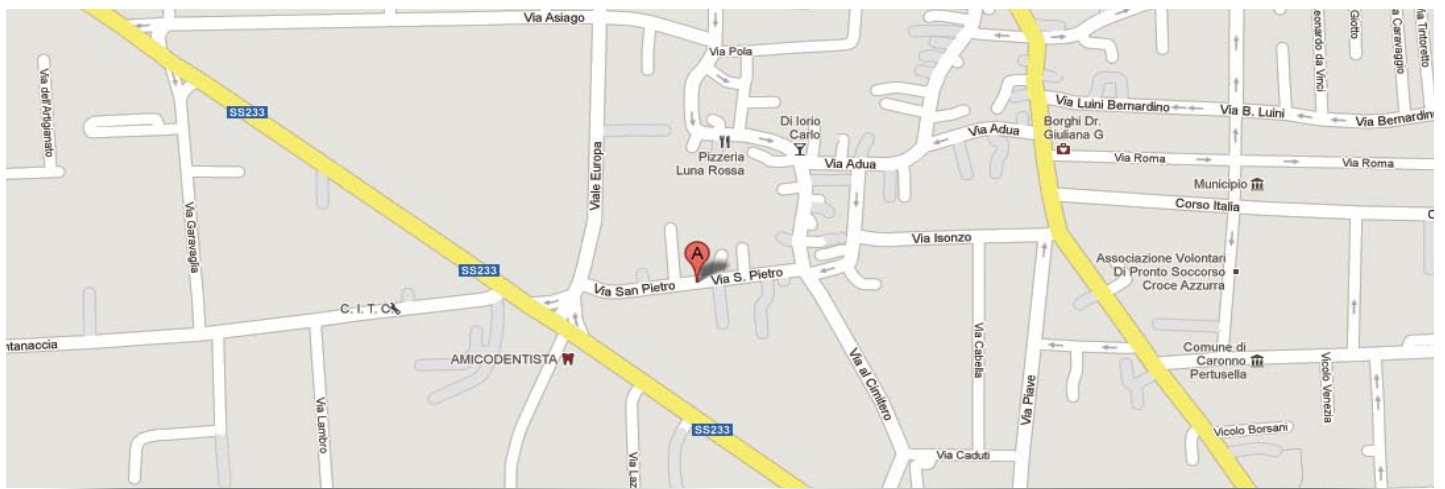

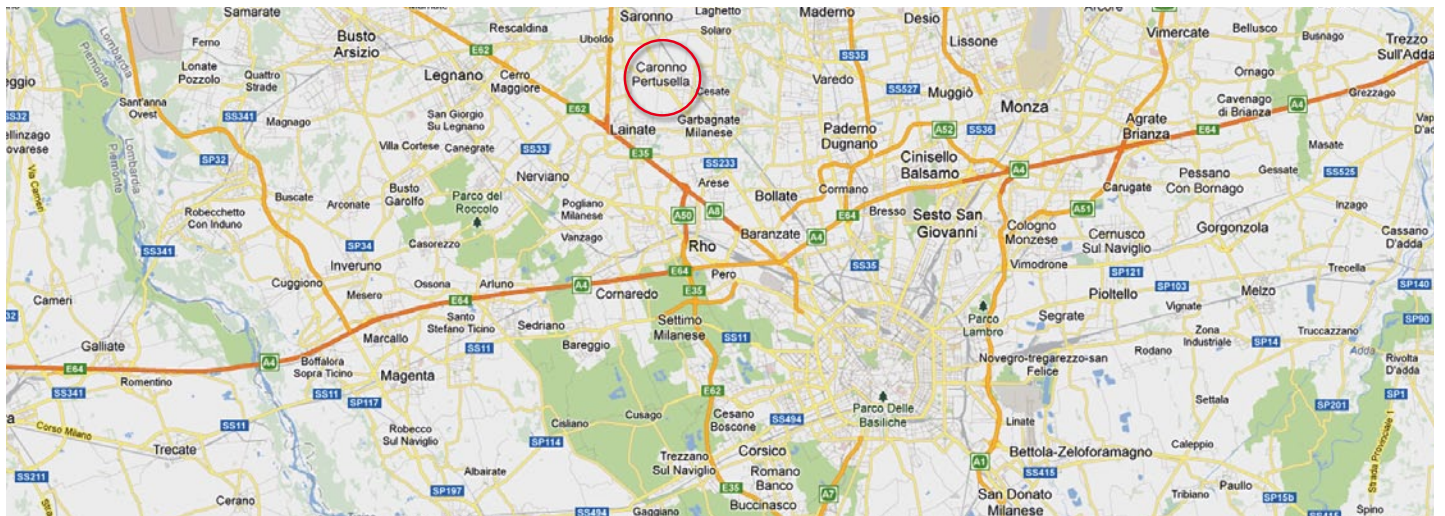

Emergency maintenance services c/o clients's premises, maintenance contracts to ensure plants' efficiency and performance.

Our planned preventative maintenance can avoid any problems on your plants and machines. With a correct maintenance our Clients can save time, money, resources.
